

## Digital Retinal Photography

One of our primary responsibilities is to protect the health and vision of your eyes. A new highly sophisticated, computer assisted digital camera in our office enables us to provide a very detailed retinal analysis of your eyes.

These digital images enable us to detect and diagnose diseases of the eye much earlier and more accurately than ever before – diseases such as glaucoma, diabetes, macula degeneration, hypertension, cataracts, HIV, risk of stroke, many juvenile retinal disorders, and dry eye disease.

We have been testing this equipment for five years and have confirmed its tremendous medical benefit to **all** of our patients

We feel that baseline retinal photography is a great benefit to all of our patients. Our charge is **\$39.00**. The fee is payable at the time of service. Please indicate your preference by checking the appropriate response and then sign at the bottom of the form.

If you are a first time patient here, I strongly recommend having this invaluable procedure.

**YES** \_\_\_\_\_ I do want the retinal photography

**NO** \_\_\_\_\_ I decline to have the retinal photography at this time and understand that my eyes will need to be dilated.
